Esta Day es muy chula, la trajo Pepone al ultimo BR de Lupiana, y me encanto el tacto que tiene, no es la tipica culata tactica de plastico, sino que es la culata de madera de Gary Cane con un recubrimiento de materia plastica (no se si es EVA) con un tacto muy bueno, parece mas que estas tocando terciopelo que plastico, me encanto.

Mecanicamente es como una GP a la que le han quitado el Chrony. El gatillo electronico, una pasada. No apta para los que gustan de meter mano o destripar sus maquinas.

Inconveniente: la venden sin seta (100 €), cosa que me parece ruin tratandose de una carabina de 1800 € destinada al FT, con lo que la seta va a ser necesaria si o si.

Tendré que rediseñar la hatsan, mas que nada para darle el tacto gomoso ese.
