

El carril para visor de la Air Arms tx200

Escrito por jton28 - 05/01/2014 10:46

Buenos dias amigos.

Ayer le puse una mira, en concreto mi leaperes 3-9-40 a mi nueva Tx200. Usé las monturas que me venían con ella de serie, creo que no son las peores, aprete bastante, puse el punto de referencia que venía en una de ellas, tire cuatro balines y en el quinto se me cae la mira, con monturas y todo. Por suerte era cespéd y poca altura y no le paso nada.

Tengo una pregunta que se que me contestareis:

¿Hay un sistema mejor que esos railes? que por otra parte me parecieron muy poco profundos y por tanto es fácil que se suelten las monturas.

Al ponerlos se marca todo el pavonado, ¿eso es inevitable verdad?. Bueno son dos preguntas lo se.

Muchas gracias

Un saludo.

=====

Necesitas una buena montura monopieza, no es normal que se marque el pavonado.

Voy a mirar a ver si tengo alguna en el cajón de los trastos.
