

Mi seta.

Escrito por Zeus - 25/04/2014 21:00

Hola, he empezado a tirar en posición FT y me había preparado una seta con velcros para ver las sensaciones, y como son buenas, he decidido hacer una permanente y este es el resultado.

Voy a intentar explicar como la he hecho porque no es muy difícil y me ha costado menos de 3€.

Estos son los materiales:

1 trozo de aluminio de 4,2x2x16cm cortado a 45º (que me ha costado una sonrisa).

2 tornillos métrica 6 de 7 y 8cm

1 taco para hormigón!!! De métrica 6, (que por fuera mide 7,5mm)

1 tubo cromado de fontanería multipropósito de unos 20cm

1 tuerca para 6mm

5 arandelas

1 trozo de gomaeva de los que usan los niños con el punzón en el cole, que pegue a la parte de debajo de la seta.

Cola blanca

Algunos materiales

Lo primero es reunir el valor para agujerear la madera (tuve toda la mañana el corazón en un puño). He ido a una carpintería para utilizar un taladro de columna y resulta que no tenía y hemos acabado haciendo el agujero con uno de mano, empezando por una broca de madera de 4mm siguiendo con una de 6mm y acabando con una de 7,5mm de metal. Probamos en una madera y con 8mm quedaba flojo el taco. Al final con la última broca no se como hice y toque un poco la madera(ME C.....) ya veremos como lo arreglo, no será para tanto.

DSCF0515 por zeusml, en Flickr

Me torcí un poquito.

https://farm6.staticflickr.com/5295/14006751001_ce7c87b8a8.jpg

DSCF0514 por zeusml, en Flickr

Y así queda por dentro

Después de tomar una tila jajajaja.. corte el taco porque era muy largo

https://farm6.staticflickr.com/5574/14006938001_78d096fe7c.jpg

DSCF0516 por zeusml, en Flickr

Así queda puesto por los dos lados, lo metí con un poco de cola blanca, no me atreví a meterlo más porque se estaba poniendo muy duro y luego me vino bien para centrar el tubo.

https://farm3.staticflickr.com/2929/14009956585_3609a33c23.jpg

Región por zeusml, en Flickr

Ahora vamos con el tornillo del guardamontes, metí una tuerca del 6 hasta el tope, luego medí el tornillo original y corte el otro más o menos y lo que hice fue redondear la tuerca con la dremel hasta el diámetro del tornillo.

https://farm8.staticflickr.com/7076/14009959225_3084fc0719.jpg

region 2 por zeusml, en Flickr

https://farm8.staticflickr.com/7387/14009966185_b0f0636db5.jpg

DSCF0533 por zeusml, en Flickr

Así queda dentro del guardamontes.

El otro tornillo es más sencillo, jijijiji... también le corte un poco en la rosca para que no entrara mucho y luego medir para el tubo, al final le tuve que poner unas arandelas por debajo del aluminio para nivelarlo con el otro.

Realmente el tubo es el que hace el trabajo de sujetar la seta, por lo que hay que medir bien para cortarlo (y si te sale mal, otro, que no vale nada).

Y ya solo montar, tornillo aluminio arandela tubo tuerca y pa dentro

https://farm6.staticflickr.com/5157/14029972513_8c4ff36182.jpg

DSCF0535 por zeusml, en Flickr

Y tornillo arandela arandela aluminio arandela tubo y ya.

https://farm8.staticflickr.com/7451/14010420304_e2fbce5970.jpg

DSCF0543 por zeusml, en Flickr

Y el otro lado.

No cabe duda de que la parte del aluminio se pude mejorar estéticamente, poniendo madera o cualquier otra cosa, el reto estaba en como sujetarlo a la carabina y esta no me parece una mala solución, sobre todo teniendo en cuenta el coste, además me he divertido haciéndola, quitando el respeto que tenia para agujerearla, y aunque me ha quedado un poquito torcido(el agujero no la seta) y la he hecho un roce estoy bastante contento.

Animaos los indecisos, que yo hace un año no había desmontado nunca una carabina y ahora mira. Un saludo.
