

Debate sobre visores

Escrito por truman - 24/03/2010 22:11

Un interesante debate sobre visores en la página de FT Euskadi

http://euskalft.org/index.php?option=com_fireboard&Itemid=59&func=view&catid=1&id=4585

Consejo de Sanjon extraído de ese debate:

"Fijad vuestro visor o arma en un banco fijo, colocad una hoja cuadrículada a 10 metros y que esté nivelada. Poned la cruz en línea con las cuadrículas. Subid con la torreta de clic dos vueltas enteras hacia arriba, y fijaros si el centro de cruz no abandona la línea de esa cuadrícula. Haced lo mismo hacia abajo y comprobad que vuelve a su sitio. Centrad el visor a 35 metros (JSB Exact 4,52 16J). Disparad con mildot hasta los 35 metros, pero a partir de esa distancia hacedlo con clic. De esta forma conservaréis la mecánica de la torreta sólo usándola en una franja pequeña, pero a la vez será la franja más difícil de centrar el disparo, (entre los 35 y los 50 metros)."
