Pintado de Culata
Escrito por imash - 26/03/2010 00:18

Los expertos del Bricolaje (Truman y Tempox) me podrían decir que material (marca) y pasos a seguir hicieron para el pintado/barnizado de sus respectivas culatas??? Gracias.

---

la ostia de donde has sacado el crucifijo ese?, se ha muerto alguien?

==========

Re: Pintado de Culata
Escrito por cachoplomo - 26/03/2010 00:44

¿ que crucifijo ?

==========

Re: Pintado de Culata
Escrito por truman - 26/03/2010 00:45

---

hay muchos sistemas

necesitas un tinte del color que quieras, nogalina es lo mas común, si te gusta rojizo como mi AT44 tengo yo el tinte.
esto se da al principio estirando bien para que no queden manchas.

Despues se da una mano de tapaporos nitrocelulosico transparente, de igual la marca, cada hora mas o menos una pasadita de lana de acero fina y nueva mano, hasta tres o cuatro veces, el acabado final se hace con lana de acero y cera de muebles, este método deja la culata con poco brillo que es como me gustan a mi.

Si no quieres acabarlo a la cera, le puedes dar un barniz bueno, del tipo barniz marino, pero te aconsejo que sea satinado para que no tenga exceso de brillo.

Otro sistema te podrá explicar Tempox, que es acabarla al aceite como su culata de CFX

El tapaporos se mezclaría con disolvente a partes iguales o no? . Lo de nueva mano te refieres al tapaporos o al tinte ?

==========

Re: Pintado de Culata
Escrito por truman - 26/03/2010 00:52

---

las sucesivas manos son de tapaporos transparente, mas o menos cada hora, lijando entre ellas con lana de acero en sentido de la veta de la madera.

lo de dar mas de una mano de tinte depende del color que quieras conseguir, practica con un taco primero porque al darle el tapaporos el color se aviva y puede quedarte mas oscuro de lo que quieres.

que feo tas imash ...me gustaba mas el muñiquin :)

==========

Re: Pintado de Culata
Escrito por imash - 26/03/2010 18:56

Si le doy barniz Marino antes hay que darle el tapaporos me imagino no?

==========

Re: Pintado de Culata
Escrito por Tempox - 26/03/2010 19:06

No me seas chambon, no le eches barniz marino.
Lo que te dice truman.
Color o linte.
tapa poros con lijada suave.
Después una mano de barniz rápida y fina, dejar secar.
Lijar esa capa y aplicar otra.
Es mejor capas finas que gruesas, siempre entre capa y capa lijar para abrir el poro del barniz y que ancle la siguiente capa.
