

Balines control de plagas.

Escrito por Tempox - 13/08/2010 19:52

Propongo hacer una prueba con estos pequeñines.

<http://img829.imageshack.us/img829/8283/municon.jpg>

De izquierda a derecha.

Senko Ultra mag, Gamo red fire, Gamo rocket, Gamo expander.

de los skenko he oído cosas buenas, no demasiado buenas....el resto no me gusta

Los rocket son "propensos" a los rebotes, los skenko no lo sé, pero esa punta parece de metal duro, por tanto...

Yo creo que de ese tipo solo dan la talla los JSB Predator.

Los blancos explotan si se disparan con chicha y son suficientemente precisos.

De los que pones ahí he catado los dos de gamo y te puedo decir que los expander al principio eran decentes y agrupaban algo, luego trasladaron la producción a un garaje y son una mierda de acabados y agrupaciones.

El Rocket mola, pero no agrupa y viene con muchas rebabas.

De los de punta hueca he probado los crow magnum y no agrupan en ninguna carabina(muy bien hechos, no se por que no van), y los super hollow point que van estupendamente, agrupan y hacen pupita eso si, son algo delicados con el viento.

Todo esto en 5.5 siempre.
